

SKILLS

Programming Languages: Python, C++ and C

Data Structures & Algorithms: Implementation using Python,C++ and C

Machine Learning: Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation

Deep Learning: Neural Networks (ANN, CNN, RNN), LSTM, GRU, Model Optimization

Large Language Models (LLMs): Prompt Engineering, Retrieval-Augmented Generation (RAG), Transformers, Hugging Face

Natural Language Processing (NLP): Text Preprocessing, Tokenization, Embeddings, N-gram Models, HMM

Data Science & Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, SQL

Time Series Analysis & Forecasting: Time Series Preprocessing, Feature Engineering, Lag Features, Statistical Analysis, Single-Step & Multi-Step Forecasting, Model Evaluation

Web Development: HTML, CSS, JavaScript, Bootstrap, Django, Flask, Streamlit

Tools & Frameworks: Scikit-learn, Pandas, NumPy, TensorFlow, PyTorch

Core Subjects: Object-Oriented Programming (OOP), DBMS, Operating Systems (OS), Computer Networks (CN)

Version Control: Git, GitHub

EDUCATION

2025 - Present	Atal Bihari Vajpayee - Indian Institute of Information Technology and Management,Gwalior Information Technology Aggregate : 100%	M.Tech
2021 - 2025	Rajiv Gandhi University Of Knowledge Technologies, Srikakulam Computer Science And Engineering Aggregate: 89.7%	B.Tech
2019 - 2021	Rajiv Gandhi University Of Knowledge Technologies, Srikakulam Maths, Physics and Chemistry Aggregate: 98.3%	Intermediate
2018 - 2019	A.P Model School , Ganguvari Sigadam Aggregate: 100%	SSC

EXPERIENCE

Python, Machine Learning, NLP, Scikit-learn, Pandas, NLTK	Data Science Intern Andhra Pradesh State Skill Development Corporation (APSSDC) May 2024 – June 2024 - Developed an NLP-based sentiment analysis model achieving 88% accuracy. - Processed and analyzed 5,000+ records using data cleaning, preprocessing & feature engineering. - Improved data quality by 30% through effective preprocessing and validation techniques. - Optimized the inference pipeline, reducing prediction time by 20%.
--	---

PROJECTS

Machine Learning,
Deep Learning,
NLP, TensorFlow,
Streamlit

AI-Powered Multimodal E-commerce Price Prediction System

Developed an end-to-end system to predict Ecommerce product prices using product descriptions and images. Extracted textual features (keywords, quality indicators, numeric analysis) and deep image features via pre-trained MobileNetV2 and ResNet50. Built a super ensemble of XGBoost, LightGBM, Random Forest, Gradient Boosting, and Ridge Regression for accurate predictions. Integrated the pipeline into a Streamlit web application for real-time price predictions and automated reporting.

NLP, LLM,
Deep Learning,
RAG, PyTorch

Retrieval-Augmented Narrative Consistency Verification using Custom Transformer

Designed and trained a 10.7M-parameter BERT-style Transformer with a hybrid BM25 + semantic retrieval RAG pipeline for narrative consistency verification. Achieved 97.56% accuracy, 0.97 Macro F1 and 0.99 ROC-AUC.

Machine Learning,
Deep Learning,
Transformers,
TensorFlow,
XGBoost, pandas

Large-Scale Benchmarking Pipeline for Photovoltaic Power Forecasting

M.Tech Thesis

Benchmarked 21 forecasting models across 4 sites, 7 horizons, and 2 temporal resolutions, totaling 4,928 evaluations. Implemented Informer, Autoformer, FEDformer, and TFT from their source papers. Audited the forecasting pipeline and fixed 13 defects, including a critical bug that returned single-step forecasts under multi-step labels, falsely making statistical models appear to outperform deep learning at long horizons; correcting it reversed the conclusion. Rebuilt the evaluation pipeline with leakage-safe chronological splits, train/test embargoes, and fit-block-only scaling.

Full Stack Web

COIN - Currency Operating Interface Navigation

COIN (Currency Operating Interface Navigation) is a cutting-edge digital payments application developed with advanced features using customized blockchain technology. It offers a glimpse into the future of digital payments by facilitating group transactions and integrating a voice assistant feature.

AWARDS AND ACHIEVEMENTS

2022 – 2024

Joint Secretary, SGC Coding Club

RGUKT-SRIKAKULAM

- Conducting Tests for the Students in Hackerrank platform to Improve thier coding skills.
- Organized coding events and workshops, fostering engagement and skill enhancement among students.
- Encouraged participation in competitive programming to cultivate a strong coding culture on campus.

2023-2024

Finalist in HITACHI 30 HACKS HACKATHON

Hitachi group

- Attained Finalist status in the HITACHI 30 HACKS HACKATHON for pioneering the future of digital payments with our innovative COIN (Currency Operating Interface Navigation) Application. Utilized blockchain technology and advanced features to revolutionize digital payment systems.

2023-2024

Event Organizer, College Tech Fest

RGUKT-SRIKAKULAM

- Managed logistics and scheduling for technical events, ensuring seamless execution of activities.
- Collaborated with faculty and students to develop engaging sessions and showcase innovative projects.

2025

Qualified GATE 2025

- Achieved GATE qualification, demonstrating strong understanding and expertise in core engineering subjects.

CERTIFICATIONS

2022-2023

Certificate For First Place in Code-O-Fiesta, Teckzite 2022, Nuzvid

RGUKT-NUZVID

2023-2024

Participation in Hackathon by Hitachi Group for Coin Project, Delhi 2024

Hitachi Group - Delhi

CODING PLATFORMS

LeetCode - Mouli2025008

GeeksforGeeks - Mouligfg

HackerRank - Moulihr
